

A Decade of Impact Report

NextDev

2025

“NextDev began with a simple vision: to build a digital startup ecosystem that creates real impact for Indonesia. Over time, it has evolved beyond incubation, becoming a platform for founders to develop solutions that address real-world problems.

In the past 10 years, NextDev has supported hundreds of early-stage startups. We've seen how startups, sparked by founders' concerns, have evolved into digital innovations driving change across various sectors in Indonesia. This journey is far from over. The startup landscape keeps changing, new challenges continue to emerge, and innovation is more critical than ever. We are committed to strengthening our programs and staying relevant in today's world.

To our founders, mentors, investors, partners, and everyone who has been part of this journey, thank you. The success of NextDev is a reflection of the collaboration and shared spirit to build a better future through digital innovation. Let's keep moving forward, creating greater impact, and unlocking more opportunities for Indonesia.”

Saki H Bramono

**Vice President Corporate Communications &
Social Responsibility at Telkomsel**

NextDev serves as a strategic CSR program by Telkomsel, integrated into Digital Ecosystem Roadmap, aligned with its commitment to environmental, social, and governance (ESG) standards.

As The Impact Incubator, the program focuses on supporting purpose-driven digital startups by helping founders build strong business fundamentals. This approach ensures that each startup is not only prepared for sustainable growth but also equipped to create meaningful and measurable impact in society.

Inclusive

Inclusive incubation that supports innovators from diverse backgrounds to develop impactful solutions

Elevate

Incubation elevates startups through innovation, business fundamentals, and ecosystem support

Inspire

NextDev helps startups expand their impact across industries and communities

Sustainability

delivered essential capital to drive innovation

Impact Summary

NextDev connects high-potential alumni to Tinc, Telkomsel Ventures' accelerator program that drives startup growth through collaborative innovation within the Telkomsel ecosystem.

5 Startups Accelerated by tinc

Batch 10

Luarkampus is an AI-powered platform that helps students find scholarships both locally and internationally. To date, Luarkampus has successfully helped over 5,000 students secure scholarships

Batch 9

MyEco is a smart building startup helping businesses reduce electricity consumption through intelligent installation solutions —trusted by 23,000+ customers across 12+ cities, earning a 4.5+ secure rating

Batch 5

Bizhare is a business investment platform utilizing a crowd funding system through information technology-based securities offerings. It is the first and largest of its kind in Indonesia

Batch 4

A smart farming company digitizing agriculture to create a more resilient food system. Since 2010, it has nurtured over 1,200 alumni and built a network of 577 social entrepreneurs around the world

Batch 1

Habibi Garden is an innovative agritech company specializing in precision agriculture, leveraging advanced mobile applications and IoT-based sensor technologies to support data-driven farming practices.

NextDev alumni that engage with Telkomsel's ecosystem benefit from validation, exposure, and potential co-creation opportunities. These collaborations strengthen their business foundation and market reach.

Slab collaborated with Majamojo to launch Metro Runner. Where is My Cat, Meow Merge on the MyTelkomsel app. (2024)

Telkomsel Mobile Simcard is used with Nuxcle's electric cargo bikes. (2023)

In collaboration with Bizhare, Telkomsel enables users to exchange Halo Points for investment voucher on the Bizhare platform. (2021)

Telkomsel and Cakap launched the 'Cakap Package' in 2020, offering 5GB for the Cakap app and general use, making language learning more accessible.

Telkomsel, in collaboration with Kostoom, supplied durable fabric masks to support the public and medical frontliners during the COVID-19 response. (2020)

Telkomsel partnered with Jahitin to produce personal protective equipment (PPE) for healthcare workers during the COVID-19 pandemic. (2020)

Telkomsel partners with Ternaknesia to ensure the proper distribution of Qurban. (2020-2023)

Telkomsel CSR program and Habibi Garden introduce automatic weather station (AWS) and precision farming technology to potato and chilli farmer in Subang and Lampung. (2017)

NextDev supports its alumni in gaining international recognition by facilitating exposure to global competitions, enabling startups to showcase their innovations on world-class stages.

**Maulana Derifato
Achmad**

CEO MyEco

"Being part of NextDev was a major turning point in myECO's startup journey. The program not only gave us access to outstanding mentors and broader networks, but also inspired us to focus more deeply on the social impact and long-term sustainability of the technology we're developing."

Hisbullah Akbar

CEO Hisa Games

"I'm truly grateful to be part of NextDev. The experience not only expanded our knowledge, but also sharpened our mindset, enhanced our network, and provided valuable insights. It allowed me to see Hisa Games from a much broader and more strategic perspective."

Margarita Tan

Chief of Growth Cakap

"Through NextDev, Cakap gained access to strategic networks and cross-generational learning—from alumni to new participants. It helps us stay relevant amid industry dynamics. The NextDev ecosystem has also supported Cakap's growth as a business with strong social value."

Reza Aulia Akbar

*CEO Science Hunter
Indonesia*

"NextDev helped us rediscover our startup's direction and vision, strengthen our identity and branding, and unlock new opportunities for strategic collaboration. This journey contributed to our business growth and long-term sustainability."

Irsan Rajamin

CEO Habibie Garden

"Joining Telkomsel's NextDev in 2016 was a key turning point for Habibie Garden. We gained access to international mentors, implemented digital farming projects in Lampung and West Java, and built strategic connections with investors."

2024

Luarkampus

Luarkampus is an AI-powered platform that helps students find local and international scholarships by offering personalized recommendations.

Molca

Molca provides AI-powered digital twin and AR/VR solutions that support industrial digitalization by optimizing operations, enhancing employee training, and enabling data-driven decision-making.

Satuplatform

Satuplatform is an all-in-one solution for managing ESG, carbon, and sustainability reporting, helping accountable for their environmental impact.

2023

AiFarm

AiFarm is an agritech startup providing a digital platform to support farmers from upstream to downstream.

Smartcoop

Smartcoop is an online application designed to help cooperatives manage and operate their businesses more easily and efficiently.

Cards

Cards is a SaaS platform focused on school operations. It provides integrated digital student cards that support both academic needs and financial transactions.

Ikan Asin Production

Ikan Asin Production Games Studio has reached over 3.5 million downloads, more than 400 thousand followers, and 100 million views across its content.

2022

Nuxcle

Nuxcle is a startup focused on electric vehicle development. Nuxcle aims to offer high-quality and functional electric vehicles at more affordable prices.

myECO

A smart home startup using IoT to reduce electricity waste through remote monitoring and automatic shutdown systems.

Shieldtag

Shieldtag develops high-tech hologram stickers used to verify product authenticity via a mobile app.

Hisa Games

Hisa Games, based in Palembang, develops original games and offers custom game creation services.

Fisiohome

Indonesia's first on-demand home physiotherapy service, offering certified therapists for post-injury and mobility recovery.

2021

Atourin

Atourin is a startup that provides trip planning services for travelers, offering thousands of tourist attractions and hundreds of itinerary recommendations.

Cleansheet

A student-led startup offering cleaning services using tech-driven solutions, empowering students to solve sanitation issues in schools and communities.

CtScope

CtScope is a startup offering an integrated health information system with three main services: eFacility, eDoctor, and ePharmacy.

Educourse

An edtech startup using STEAM (Science, Technology, Engineering, Art, Math) with AI and AR to enhance learning.

Science Hunter Indonesia

An education platform promoting science through research, exploration, and creative content, run by youth and researchers across Indonesia.

SejutaCita

A mobile app helping students find active learning opportunities like competitions, scholarships, internships, and events to support personal and career growth.

2020

Doclink

A mobile app that connects users with nearby healthcare providers and facilities, improving access especially for those with limited mobility.

Duitin

A mobile app that enables individuals and businesses to join the #RecyclingMovement by simplifying waste recycling.

Komerce

An end-to-end enabler platform connecting SMEs and youth to build e-commerce teams and help businesses go digital.

Parakerja

Creates inclusive training environments for persons with disabilities, focusing on digital skills. Recently launched sign language classes with over 18,000 participants.

2019

Eduka

Provides thousands of structured practice questions to help students study consistently.

FishGo

A digital platform that helps traditional fishers locate fishing spots and detect biomass in real-time up to 40 meters deep using IoT technology.

Garda Pangan

A platform that helps agriculture and hospitality sectors manage food waste by converting it into animal feed using black soldier fly larvae.

Ibunda

A mental health platform offering free online and offline counseling services with certified psychologists in Jakarta and Bandung.

Jagel

A platform to easily create Android apps for services like online transport, laundry, massage, food delivery, reservations, school payments, and more.

MOI

A mobile app providing on-demand health services from midwives and nurses delivered to homes.

Ravenry

An on-demand research platform offering freelance solutions for professionals and organizations.

2018

Bizzhare

A business investment platform using equity crowdfunding, licensed by Indonesia's Financial Services Authority (OJK).

Hello Beauty

A beauty service marketplace offering over 10,000 treatments across 118 cities in Indonesia.

Lindungi Hutan

A crowdfunding website focused on forest and environmental conservation in Indonesia.

Neurafarm

A tech platform that empowers farmers through AI and data, helping them make better decisions and improve productivity.

2017

Cakap

A language learning startup offering online lessons through video calls and chat with certified tutors.

Botika

A tech company using Natural Language Processing (NLP) to help businesses automate customer service and marketing via AI-powered chatbots.

Karapan

A web-based e-commerce platform for livestock farmers, helping them market and sell quality meat products verified for traceability.

2015 - 2016

Habibi Garden

A precision agriculture company using mobile apps and sensors to help farmers monitor irrigation and crops remotely.

Koostom

An online platform linking customers with local home tailors across Indonesia to produce custom clothing.

Gandeng Tangan

A peer-to-peer lending platform that connects the public with micro and small businesses to support Indonesia's micro economy.
